

Summary

Detail-oriented professional with experience in client support, system operations QA, and data-focused projects, with a growing focus on data analysis and process improvement. Skilled in SQL, Python, and Excel for data cleaning, validation, reporting, and analysis, with strengths in troubleshooting workflows, improving data accuracy, and supporting cross-functional teams. Brings an operations-minded approach to reconciliation, documentation, and turning structured data into clear business insights.

Core Skills

Data & Analytics

- SQL (Window Functions, CTEs, Joins)
- Python (Pandas, NumPy, Matplotlib, Seaborn)
- Advanced Excel (data analysis, validation, reporting)
- Visualization Tools (Power BI, Tableau)

Soft Skills

- Strong attention to detail
- Problem-solving mindset
- Ability to manage multiple tasks

Operations & Data Quality

- Data auditing & validation
- Process improvement
- KPI tracking & reporting
- Documentation & audit support

Cloud & Data Platforms (Foundational exposure)

- AWS (EC2, S3, RDS)
- Microsoft Fabric
- Databricks & Snowflake (Exploration & analysis)

Featured Projects

[Shipment Lifecycle Analysis](#) | SQL - Python

Personal Project | Jan 2026

- Built analytics-ready datasets using reusable SQL views to consolidate shipment, events, and financial data.
- Identified facility-level detention affecting **73% of shipments** despite strong on-time delivery performance.
- Discovered financial effects of delays, where late shipments generated an average trip margin of **\$694 vs. \$1,603** for on-time shipments.

[Strategic Sales & Profitability Analysis](#) | Python

Personal Project | Aug 2025

- Analyzed 15 years of sales data of a Printing & Marketing company, **identifying a 50% shift** toward digital sales channels.
- Evaluated Profit vs Revenue to surface client concentration risk and margin dependency on top customers.
- Delivered dashboards visualizing seasonal demand patterns (February/July peaks) to support inventory planning.

[Data Cleaning Pipeline: Global Layoffs](#) | SQL

Personal Project | Sep 2025

- Cleaned and standardized a 2,361-row global layoffs dataset into 1,995 analysis-ready records by resolving duplicates and missing values.
- Engineered a reliable SQL data-cleaning workflow using staging tables and window functions to ensure high-quality data validation.

Professional Experience

System Operations QA Specialist

Vensure Employer Services | Jan 2025 – July 2025

- **Audited 1,000–2,000 records weekly**, ensuring high levels of accuracy, consistency, and compliance with operational standards.
- **Documented 5+ SOPs** that improved process efficiency and **reduced testing and training time by 50%**.
- Built Excel reports to track KPIs and identify operational data inconsistencies.
- Investigated and resolved data discrepancies, reducing risk in administrative and financial processes.

Senior Client Relations Associate

Vensure Employer Services | Mar 2023 – Jan 2025

- Managed account data for **100+ clients**, maintaining accurate records and timely updates across internal systems.
- Coordinated benefit-plan setup for **20+ client accounts**, reducing input errors and data discrepancies.
- Improved communication workflows between operations and management, reducing rework and improving issue resolution.
- Supported documentation and compliance activities to maintain alignment with internal policies and service standards.

Education

Systems Engineering Unidades Tecnologicas de Santander	Feb 2023 – In Progress
Data Analysis Bootcamp ASOANDES – Ministerio TIC	Aug 2025 – Nov 2025
Google AI Professional Certificate Google – Coursera	Obtained Mar 2026
